Claims 1-51 are rejected under 35 U.S.C. 112 (second paragraph) as being indefinite in the recital of the term "pragmatic". This term does not have a well-defined scope and meaning in the context of the instant claim language.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-51 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over either claims 1-50 of copending Application No. 10/783,103 or claims 1-36 of copending Application No 10/783,411. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant label includes the receiver element of S.N. 10/783,411 and the experimental modification of the prior art in order to ascertain optimum operating conditions (e.g., determine the diameter of the void initiating particles of S.N. 10/783,103) fails to render applicants' claims patentable in the absence of unexpected results.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
